Amin's Pathology Laboratory Private Limited

Notes to the financial statements

for the year ended 31 March 2023

(Currency : Indian Rupees in lakhs)

1 Background of the Company and nature of operation

Amins Pathology Laboratory Private Limited (the 'Company'), was incorporated on 15 October 2012 and is engaged in the business of providing healthcare facilities. The principal activities of the Company consist of providing pathology and related healthcare services.

The Company is a private limited company incorporated and domiciled in India. The address of its corporate office is 250 D Udyog bhavan Worli Mumbai. As at 31 March 2023, Metropolis Healthcare Limited, the holding company owned 100% of the Company's equity share capital.

2 Basis of preparation, measurement and significant accounting policies

2.1 Basis of preparation and measurement

a Statement of compliance:

The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") as notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 ('Act') read with the Companies (Indian Accounting Standards) Rules, 2015 as amended by relevant amendment rules issued thereafter.

The financial statements of the Company for year ended 31 March 2023 were authorised for issue in accordance with a resolution of the Board of Directors on 15 May 2023.

The accounting policies are applied consistently to all the periods presented in the financial statements.

b Current vs non-current classification:

All the assets and liabilities have been classified into current and non current.

Assets:

An asset is classified as current when it satisfies any of the following criteria:

- a) it is expected to be realised in, or is intended for sale or consumption in, the Company's normal operating cycle;
- b) it is held primarily for the purpose of being traded;
- c) it is expected to be realised within twelve months after the reporting date; or
- d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

Liabilities:

A liability is classified as current when it satisfies any of the following criteria:

- a) it is expected to be settled in the Company's normal operating cycle;
- b) it is held primarily for the purpose of being traded;
- c) it is due to be settled within twelve months after the reporting date; or
- d) the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Operating Cycle

All assets and liabilities have been classified as current or non-current as per the company normal operating cycle and other criteria set out in the Schedule III to the Companies Act 2013. Based on the nature of services and the time taken between acquisition of assets/inventories for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of the classification of assets and liabilities into current and non-current.

c Basis of measurement

These financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value or revalued amount:

- Certain financial assets and liabilities measured at fair value
- Net defined benefit (asset) / liability - Fair value of plan assets less present value of defined benefit obligations

Amins Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2022

(Currency : Indian Rupees in lakhs)

2 Basis of preparation, measurement and significant accounting policies (Continued)

2.1 Basis of preparation and measurement (Continued)

d Key estimates and assumptions

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

The areas involving critical estimates or judgements are :

- i. Recognition of deferred tax assets; (Note 2.2(l))
- ii. Measurement of defined benefit obligations; (Note 2.2(j))
- iii. Leases - Critical judgements in determining the discount rate (Note 2.2(k))
- iv. Impairment of Goodwill (Note 2.2(b))

e Measurement of fair values

Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the Financial instruments (refer note no 33)

2.2 Significant accounting policies

a) Property plant and equipment

Recognition and measurement:

Items of property, plant and equipment, other than freehold land are measured at cost less accumulated depreciation and any accumulated impairment losses

Freehold land is carried at cost and is not depreciated. The cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, (after deducting trade discounts and rebates), any directly attributable costs of bringing the asset to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the item and restoring the site on which it is located.

Amins Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2022

(Currency : Indian Rupees in lakhs)

2 Basis of preparation, measurement and significant accounting policies (Continued)

2.2 Significant accounting policies (Continued)

a) Property plant and equipment (Continued)

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of profit and loss when the item is derecognized.

Subsequent expenditure:

Subsequent costs are included in the assets carrying amount or recognized as a separate asset, as appropriate only if it is probable that the future economic benefits associated with the item will flow to the Company and that the cost of the item can be reliably measured. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repair and maintenance are charged to profit and loss during the reporting period in which they are incurred.

Depreciation:

Depreciation of these property, plant and equipment commences when the assets are ready for their intended use. Depreciation on property, plant and equipment, other than leasehold improvements, is provided under the written down value method in the manner prescribed under Schedule II of the Act, except for the cases where the life is different than as indicated in Schedule II of the Act which is based on the technical evaluation of useful life carried out by the management:

Particulars	Management's estimate of useful life	Useful life as per Schedule II
Laboratory Equipment's (Plant & Equipment's) : (Electrical Machinery, X-ray & diagnostic equipment's namely Cat-scan, Ultrasound , ECG monitors.)	13 years	13 years
Computers	6 years	3 years
Furniture and Fixtures	15 years	10 years
Vehicles	10 years	8 years

Leasehold improvement is amortized over the lease term i.e. the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate

b) Intangible assets

Goodwill

Goodwill that arises on a business combination is subsequently measured at cost less any accumulated impairment losses

Other Intangible assets:

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and any accumulated impairment losses.

Amortization:

Goodwill is not amortised and is tested for impairment annually.

c) Impairment of non-financial assets

The Company's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an individual asset (or where applicable, that of cash generating unit (CGU) to which the asset belongs) is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or CGU).

Amins Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2022

(Currency : Indian Rupees in lakhs)

2 Basis of preparation, measurement and significant accounting policies (Continued)

2.2 Significant accounting policies (Continued)

c) Impairment of non-financial assets (Continued)

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognised in the statement of profit and loss. After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

d) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign exchange forward contracts, futures and currency options.

1. Financial assets

Financial assets are initially recognized when the Company becomes a party to the contractual provisions of the instrument. All financial assets other than those measured subsequently at fair value through profit and loss, are recognized initially at fair value plus transaction costs that are attributable to the acquisition of the financial asset.

Trade receivables are initially recognised at transaction price as they do not contain a significant financing component. This implies that the effective interest rate for these receivables is zero. Subsequently, the company applies lifetime expected credit loss model for measurement of trade receivables.

Subsequent measurement

For the purpose of subsequent measurement, financial assets are classified in three categories:

- Amortized cost,
- Fair value through profit (FVTPL)
- Fair value through other comprehensive income (FVTOCI)

on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Amortized cost :

A financial instrument is measured at the amortized cost if both the following conditions are met:

The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method.

Fair value through profit and loss ('FVTPL'):

All financial assets that do not meet the criteria for amortised cost or fair value through other comprehensive income are measured at fair value through profit or loss with all changes recognized in the Statement of Profit and Loss. Interest (basis EIR method) income from financial assets at fair value through profit or loss is recognised in the statement of profit and loss within finance income/ finance costs separately from the other gains/ losses arising from changes in the fair value.

Derecognition:

A financial asset (or, where applicable, a part of a financial asset or a part of a group of similar financial assets) is primarily derecognized (i.e. removed from the Company's balance sheet) when:

- The contractual rights to receive cash flows from the financial asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either
- (a) the Company has transferred substantially all the risks and rewards of the asset, or
- (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On de-recognition, any gains or losses on all equity instruments (measured at FVTPL) are recognized in the Statement of Profit and Loss.

Amins Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2022

(Currency : Indian Rupees in lakhs)

2 Basis of preparation, measurement and significant accounting policies (Continued)

2.2 Significant accounting policies (Continued)

d) Financial Instruments (Continued)

1. Financial assets (Continued)

Impairment of financial assets

In accordance with Ind-AS 109, the Company applies Expected Credit Loss ("ECL") model for measurement and recognition of impairment loss on the financial assets measured at amortized cost and debt instruments measured at FVOCI.

Trade receivables

The Company reviews its trade receivables to assess impairment at regular intervals. The Company's credit risk is primarily attributable to its trade receivables. In determining whether impairment losses should be reported in the statement of profit and loss, the Company makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows. Accordingly, an allowance for expected credit loss is made where there is an identified loss event or condition which, based on previous experience, is evidence of a reduction in the recoverability of the cash flows.

Impairment of financial instruments (other than at fair value)

The Company assesses on a forward-looking basis the expected credit loss associated with its assets carried at amortised cost and FVTOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 - Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

2. Financial liabilities

Initial recognition and measurement

Financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss, transaction costs that are directly attributable to its acquisition or issue.

Subsequent measurement

Subsequent measurement is determined with reference to the classification of the respective financial liabilities.

Financial Liabilities at Fair Value through Profit or Loss (FVTPL):

A financial liability is classified as Fair Value through Profit or Loss (FVTPL) if it is classified as held-for trading or is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and changes therein, including any interest expense, are recognized in the Statement of Profit and Loss.

Financial Liabilities at amortized cost:

After initial recognition, financial liabilities other than those which are classified as FVTPL are subsequently measured at amortized cost using the effective interest rate ("EIR") method.

Amortized cost is calculated by taking into account any discount or premium and fees or costs that are an integral part of the EIR. The amortization done using the EIR method is included as finance costs in the Statement of Profit and Loss.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

Amins Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2022

(Currency : Indian Rupees in lakhs)

2 Basis of preparation, measurement and significant accounting policies (Continued)

2.2 Significant accounting policies (Continued)

d) Financial Instruments (Continued)

2. Financial liabilities (Continued)

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

e) Inventories

Inventories comprise of reagents, chemicals, diagnostic kits, medicines and consumables. Inventories are valued at lower of cost and net realizable value. Cost comprises the cost of purchase and all other costs attributed to bring the goods to that particular condition and location. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

f) Cash and Cash Equivalents

Cash and cash equivalents in the balance sheet and cash flow statement includes cash at bank and on hand, deposits held at call with banks, with original maturities less than three months which are readily convertible into cash and which are subject to insignificant risk of changes in value.

g) Provisions, Contingent Liabilities and Contingent Assets

A provision is recognized when the enterprise has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which a reliable estimate can be made. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognized as finance cost.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence is confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent liabilities are not accounted but disclosed in the financial statements, unless possibility of an outflow of resources embodying economic benefit is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent Assets are not recognized till the realization of the income is virtually certain. However the same are disclosed in the financial statements where an inflow of economic benefit is probable.

h) Revenue Recognition

Revenue is recognised at an amount that reflects the consideration to which the Company expects to be entitled in exchange for transferring the goods or services to a customer i.e. on transfer of control of the service to the customer. Revenue from sales of goods or rendering of services is net of indirect taxes, returns and discounts;

Revenue comprise of revenue from providing healthcare services such as health check-up and laboratory services. Pathology service is the only principal activity and reportable segment from which the Company generates its revenue.

Revenue is recognised once the testing samples are processed for requisitioned test, to the extent that it is probable that the economic benefits will flow to the Company and revenue can be reliably measured.

Contract liabilities - A contract liability is the obligation to transfer services to a customer for which the Company has received consideration from the customer. If a customer pays consideration before the Company transfers services to the customer, a contract liability is recognised when the payment is made. Contract liabilities are recognised as revenue when the Company performs under the contract.

2.2 Significant accounting policies (Continued)

i) Other Income

Interest income

For all financial instruments measured at amortized cost, interest income is recorded using the effective interest rate (EIR). EIR is the rate which exactly discounts the estimated future cash receipts over the expected life of the financial instrument to the gross carrying amount of the financial asset. When calculating the EIR the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayments, extensions, call and similar options); expected credit losses are considered if the credit risk on that financial instrument has increased significantly since initial recognition

Dividend income

Dividends are recognized in statement of profit and loss on the date on which the Company's right to receive payment is established.

j) Employee Benefits

(i) Short-term Employee benefits

Liabilities for wages and salaries, bonus, compensated absences and ex gratia including non-monetary benefits that are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service are classified as short term employee benefits and are recognized as an expense in the Statement of Profit and Loss as the related service is provided.

A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(ii) Post-Employment Benefits

Defined Contribution Plans

A defined contribution plan is a post-employment benefit plan under which a company pays specified contributions to a separate entity and has no obligation to pay any further amounts. The Company makes contribution to provident fund in accordance with Employees Provident Fund and Miscellaneous Provisions Act, 1952 and Employee State Insurance. Contribution paid or payable in respect of defined contribution plan is recognized as an expense in the year in which services are rendered by the employee.

Defined Benefit Plans

The Company's gratuity benefit scheme is a defined benefit plan. The liability recognised in the balance sheet in respect of gratuity is the present value of the defined benefit/obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gain losses and past service costs. The defined benefit/obligation are calculated at balance sheet date by an independent actuary using the projected unit credit method.

Re-measurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in other comprehensive income (OCI).

k) Leases

Ind-As 116:

As a lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company. Contracts may contain both lease and non-lease components. The Company allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Company is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- Fixed payments (including in-substance fixed payments), less incentives receivables
- Variable lease payments that are based on an index or a rate, initially measured using the index or rate at the commencement date
- amount expected to be payable by the company under residual value guarantees
- the exercise price of a purchase option if the Company is reasonably certain to exercise that option, and
- Payments of penalties for terminating the lease, if the lease term reflects the Company exercising that option

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Company:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by Value Ind AS Retail Limited, which does not have recent third party financing, and makes adjustments specific to the lease, e.g. term, country, currency and security.

Variable lease payments that depend on sales are recognised in profit or loss in the period in which the condition that triggers those payments occurs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of equipment and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT equipment and small items of office furniture.

The lease liability is presented as a separate line in the statement of financial position. The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.

The right-of-use assets are presented as a separate line in the statement of financial position. The right-of-use assets are initially recognized at cost which comprises of the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day and any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured. The costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Amins Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2022

(Currency : Indian Rupees in lakhs)

2 Basis of preparation, measurement and significant accounting policies (Continued)

2.2 Significant accounting policies (Continued)

l) Income-tax

Income tax expense /income comprises current tax expense income and deferred tax expense income. It is recognized in statement of profit and loss except to the extent that it relates to items recognized directly in equity or in other comprehensive Income, in which case, the tax is also recognized directly in equity or other comprehensive income, respectively.

Current Tax

Current tax comprises the expected tax payable or recoverable on the taxable profit or loss for the year and any adjustment to the tax payable or recoverable in respect of previous years. It is measured using tax rates enacted or substantively enacted by the end of the reporting period.

- Current tax assets and liabilities are offset only if, the Company has a legally enforceable right to set off the recognized amounts; and
- intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognized in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purpose and the amount considered for tax purpose.

Deferred tax assets are recognized for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilized such reductions are reversed when it becomes probable that sufficient taxable profits will be available.

Unrecognized deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be recovered. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- i) the entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

m) Dividend

The Company recognizes a liability for any dividend declared but not distributed at the end of the reporting period, when the distribution is authorized and the distribution is no longer at the discretion of the Company on or before the end of the reporting period.

n) Earnings per share:

Basic Earnings per share is calculated by dividing the profit or loss for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the profit or loss for the period attributable to the equity shareholders and the weighted average number of equity shares outstanding during the period is adjusted to take into account:

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- Weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

o) Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM) as defined in Ind AS-108 'Operating Segments' for allocating resources and assessing performance.

p) Recent Indian Accounting Standards (Ind AS)

Recent Pronouncements

Ministry of Corporate Affairs (MCA), vide notification dated 31 March 2023, has made the following amendments to Ind AS which are effective 1st April 2023:

- Amendments to Ind AS 1, Presentation of Financial Statements where the companies are now required to disclose material accounting policies rather than their significant accounting policies.
 - Amendments to Ind AS 8, Accounting policies, Changes in Accounting Estimates and Errors where the definition of 'change in account estimate' has been replaced by definition of 'accounting estimate'.
 - Amendments to Ind AS 12, Income Taxes where the scope of Initial Recognition Exemption (IRE) has been narrowed down.
- Based on preliminary assessment, the Company does not expect these amendments to have any significant impact on its financial statements.

q) Rounding of amounts

All amounts disclosed in financial statements and notes have been rounded off to the nearest lakhs as per the requirement of schedule III. The transactions & balances with values below the rounding off norms adopted by the Company have been reflected as "0.00" in the relevant note to these financial statements.

* Goodwill of Rs. 588.20 lakhs are on account of acquisition of Dr. Amin's Pathology Laboratory, Mumbai during the year ended 31 March 2013.

Amin's Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

as at 31 March 2023

(Currency : Indian Rupees in lakhs)

4 Goodwill & Intangible assets (Continued)

Goodwill with indefinite useful life

Carrying amount of goodwill which is allocated to the Pathology division as at 31 March 2023 is Rs. 588.20 Lakhs (31 March 2022: Rs. 588.20 Lakhs). It was acquired on account of business purchase from Dr. Amin's Pathology Laboratory.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to the cash generating units (CGU), which benefit from the synergies of the acquisition.

Cash Generating Unit	31 March 2023	31 March 2022
Amin's Pathology Laboratory Private Limited	588.20	588.20

The recoverable amount of a CGU is based on its value in use. The value in use is estimated using discounted cash flows over a period of 5 years. we believe 5 years to be most appropriate time scale over which to review and consider annual performance before applying a fix terminal value multiple to year end cash flow.

Key assumptions used in the value-in-use calculations

Assumptions	How determined
Budgeted EBITDA growth rate	Budgeted EBITDA has been based on past experience adjusted for the following: - Revenue in the diagnostic service is expected to grow on account of changing lifestyle and food habit. Revenue and EBITDA are factored by focused approach towards B2C segment, network expansion, operational efficiencies and automation.
Terminal value growth rate	Long-term growth rate used for the purpose of calculation of terminal value has been determined by taking into account nature of business, long term inflation expectation and long term GDP expectation for the Indian economy
Post tax risk adjusted discount rate	The discount rate applied to the cash flows of company's operations is generally based on the risk free rate for ten year bonds issued by the government in India. These rates are adjusted for a risk premium to reflect both the increased risk of investing in equities and the systematic risk of of the Group.

Particulars	31 March 2023	31 March 2022
Post tax risk adjusted discount rate	12.40%	11.50%
Terminal value growth rate	5.00%	5.00%
Budgeted EBITDA growth rate	0 - 44.4%	0 - 15%

These assumptions are reviewed annually as part of management's budgeting and strategic planning cycles. These estimates may differ from actual results. The values assigned to each of the key assumptions reflect the Management's past experience as their assessment of future trends, and are consistent with external / internal sources of information.

The estimated recoverable amount of the CGU exceeds its carrying amount. The Company has also performed sensitivity analysis calculations on the projections used and discount rate applied. Given the significant headroom that exists, and the results of the sensitivity analysis performed, it is concluded that there is no significant risk that reasonable changes in any key assumptions would cause the carrying value of goodwill to exceed its value in use.

32 Earnings per share (EPS)

Basic EPS calculated by dividing the net profit for the year attributable to equity holders by the weighted average number of equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit attributable to equity holders (after adjusting profit impact of dilutive potential equity shares, if any) by the aggregate of weighted average number of equity shares outstanding during the year and the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

Amin's Pathology Laboratory Private Limited

Notes to the financial statements (Continued) for the year ended 31 March 2023

33 Financial instruments – Fair values (Continued)

B. Fair value hierarchy

Ind AS 107, 'Financial Instrument - Disclosure' requires classification of the valuation method of financial instruments measured at fair value in the Balance Sheet, using a three level fair-value-hierarchy (which reflects the significance of inputs used in the measurements). The hierarchy gives the highest priority to un-adjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and lowest priority to un-observable inputs (Level 3 measurements). The three levels of the fair-value-hierarchy under Ind AS 107 are described below:

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level. This is the case for unlisted equity securities included in level 3.

Financial instruments measured at fair value

The following tables show the valuation techniques used in measuring Level 2 fair values, as well as the significant unobservable inputs used.

Type	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Non current financial assets measured at amortized cost	Discounted cash flows: Under discounted cash flow method, future cash flows are discounted by using rates which reflect market risks. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, discount rate and credit risk. The probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value.	Not applicable	Not applicable

Transfers between Levels

There have been no transfers between levels during the reporting year.

Amin's Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2023

(Currency : Indian Rupees in lakhs)

33 Financial instruments – Fair values and risk management (Continued)

Financial risk management

The company's board of Directors has overall responsibility for the establishment and oversight of the company's risk management framework. Key roles and responsibilities are defined in line with risk management plan and are reviewed at regular interval. This self regulatory process and procedure ensures efficient conduct of business in micro and macro risk environment.

The Company has exposure to the following risks arising from financial instruments

- Credit risk
- Liquidity risk
- Market risk
- Currency risk

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's trade and other receivables and cash and cash equivalents. The maximum exposure to credit risk in case of all the financial instruments covered below is restricted to their respective carrying amount

a. Trade receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

The Company does not have any significant concentration of credit risk except 2 customers which constituted 10% of the total trade receivables (31 March 2022: 2 customers and 10%).

Management has analysed the debtors outstanding as at 31 March 2023 and concluded that the history of bad debts on the profile of its current debtors is insignificant. The debtors which are outstanding as at 31 March 2022 have been generally regular in making payments and hence it does not expect significant impairment losses on its current profile of outstanding debtors. The debtors which have defaulted in the past are mostly on account of any litigations and its experience regarding bad debts has been very low in the past.

On the basis of above, no additional provision has been made in the books of accounts under Ind AS.

	Amount
Balance as at 1 April 2021	4.00
Expected Credit Loss allowance	2.04
Deduction on account of write off and collections	-
Balance as at 31 March 2022	6.04
Expected Credit Loss allowance	-
Reversal of credit loss allowance	(1.95)
Deduction on account of write off and collections	-
Balance as at 31 March 2023	4.09

b. Cash and cash equivalents and Other bank balances

The Company held cash and cash equivalents and other bank balances of Rs 62.77 Lakhs at 31 March 2023 (31 March 2022: 147.18 lakhs). The cash and cash equivalents are held with bank and financial institution counterparties with good credit ratings.

Amin's Pathology Laboratory Private Limited

Notes to the financial statements (Continued)

for the year ended 31 March 2023

(Currency : Indian Rupees in lakhs)

33 Financial instruments – Fair values and risk management (Continued)

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Maturities of financial liabilities

The amounts disclosed in the table are the contractual undiscounted cash flows.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on their contractual maturities:

31 March 2023	Contractual cash flows				
	Carrying amount	Total	Upto 1 year	1-3 years	More than 3 years
Financial liabilities (Non-current)					
Lease Liabilities	-	-	-	-	-
Borrowings	-	-	-	-	-
Other non-current financial liabilities	-	-	-	-	-
Financial liabilities (current)					
Lease Liabilities	-	-	-	-	-
Interest payables on borrowings	-	-	-	-	-
Trade payables	166.62	166.62	166.62	-	-
Other current financial liabilities	30.30	30.30	30.30	-	-
Total	196.92	196.92	196.92	-	-

Other current financial liabilities (including borrowings)	0.07	0.07	0.07	-	-
Total	178.68	153.23	153.23	-	-

Amin's Pathology Laboratory Private Limited

Notes to the financial statements (Continued) for the year ended 31 March 2023

(Currency : Indian Rupees in lakhs)

33 Financial instruments – Fair values and risk management (Continued)

Interest rate risk

Interest rate risk can be either fair value interest rate risk or cash flow interest rate risk. Fair value interest rate risk is the risk of changes in fair values of fixed interest bearing investments because of fluctuations in the interest rates. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing investments will fluctuate because of fluctuations in the interest rates.

The Company does not account for any fixed-rate financial assets or financial liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows.

	31 March 2023	31 March 2022
Fixed-rate instruments		
Financial assets	12.05	11.07
Financial liabilities	-	-
	<u>12.05</u>	<u>11.07</u>
Variable-rate instruments		
Financial assets	-	-
Financial liabilities	-	25.45
	<u>-</u>	<u>25.45</u>
Total	<u>12.05</u>	<u>36.52</u>

Market risk:

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Company's income or the value of its holdings of financial instruments. The Company is exposed to market risk primarily related to foreign exchange rate risk and interest rate risk. The objective of market risk management is to avoid excessive exposure in foreign currency revenues and costs.

Currency risk:

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company has foreign currency trade payables and receivables and is therefore exposed to foreign exchange risk.

Exposure to currency risk (Exposure in different currencies converted to functional currency i.e. INR)

The currency profile of financial assets and financial liabilities as at 31 March 2023 are as below (currency in lakhs):

31 March 2023	USD	EUR	GBP	SGD
Financial assets (A)				
Trade and other receivables	43.31	-	-	-
Financial liabilities (B)				
Trade and other payables	-	-	-	-
Net exposure (A - B)	<u>43.31</u>	<u>-</u>	<u>-</u>	<u>-</u>

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Indian Rupee against foreign currencies at 31 March 2023 and 31 March 2022 would have affected the measurement of

Effect in INR	31 March 2023		31 March 2022	
3% movement	Strengthening	Weakening	Strengthening	Weakening
USD	(1.30)	1.30	-	-
	<u>(1.30)</u>	<u>1.30</u>	<u>-</u>	<u>-</u>

35 Lease Accounting

1 The following is the summary of practical expedients elected on initial application:

- i Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date
 - ii Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application
 - iii Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.
 - iv Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly, Ind AS 116 is applied only to contracts that were previously identified as leases under Ind AS 17.
- 2 The effect of depreciation and interest related to Right Of Use Asset and Lease Liability are reflected in the Profit & Loss Account under the heading "Depreciation and Amortisation Expense" and "Finance costs" respectively under Note No 27 and 26
 - 3 The weighted average incremental borrowing rate applied to lease liabilities in FY 2022-23 is 9.20% - 10.10%.
 - 4 Following are the changes in the carrying value of right of use assets for the year ended 31 March 2023

40 Employee benefits

(a) Defined benefit obligation

The Company has gratuity as defined benefit retirement plan for its employees. The Present value of obligation is Rs 26.73 Lakhs (31 March 2022 Rs. 8.67 Lakhs) and Fair value of plan assets is Rs. 75.06 lakhs (31 March 2022 Rs. 70.15) as at 31 March 2023.

As per IND AS 19 "Employee Benefits", when an entity has a surplus in a defined benefit plan, it shall measure the net defined benefit asset at the lower of the surplus in the defined benefit plan and the asset ceiling, determined using the discount rate specified in paragraph 83. The Company has not recognised the excess of asset over liability as the Company would not be able reduce future contribution to the fund due to the conditions specified under para 65 of Ind AS 19.

(b) Defined contribution plan

The Company contributes towards statutory provident fund as per the Employees Provident Funds and Miscellaneous Provisions Act, 1952 and towards employee state insurance as per the Employees' State Insurance Act, 1948. The amount of contribution to provident fund and Employee State Insurance Scheme recognised as expenses during the year is Rs. 61.98 Lakhs (31 March 2022: Rs. 1.76 Lakhs)

(c) Compensatory absences:

The Company provides for the encashment of leave or leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits, for future encashment. The liability is provided based on the number of days of unutilized leave at each balance sheet date on the basis of an independent actuarial valuation. Amount of Rs 7.07 lakhs (31 March 2022 Rs. 0.43 lakhs) has been recognised in the Statement of profit and loss on account of provision for long-term employment benefit.

41 Segment Reporting

The Company operates in a single segment i.e "Pathology". Accordingly, in terms of paragraph 4 of the Indian Accounting Standard 108 (IND AS-108) "Segment Reporting", no disclosures related to segments are presented in this financial statement.
